Absolute pressure switch
Stainless steel switch enclosure
Models APW, APW10

Applications
- Absolute pressure monitoring and control of processes
- Safety-critical applications in general process instrumentation, especially in the chemical and petrochemical industries, oil and gas industries, power generation incl. nuclear power plants, water/wastewater industries, mining
- For gaseous, liquid and aggressive media, also in aggressive ambience

Special features
- No power supply needed for switching of electrical loads
- Robust switch enclosure from stainless steel 316L, IP66, NEMA 4X
- Setting ranges from 0 ... 25 mbar abs. to 0 ... 1.5 bar abs.
- Intrinsic safety Ex ia available
- 1 or 2 independent set points, SPDT or DPDT, high switching power up to AC 250 V, 20 A

Description
These high-quality absolute pressure switches have been developed especially for safety-critical applications. The high quality of the products and manufacturing in accordance with ISO 9001 ensure reliable monitoring of your plant. In production, the switches are traced by quality assurance software at every step and subsequently are 100 % tested.

In order to ensure as flexible operation as possible, the absolute pressure switches are fitted with micro switches, which enable the switching of an electrical load of up to AC 250 V, 20 A directly.

For lower switching power ratings, such as for PLC applications, argon gas-filled micro switches with gold-plated contacts can be selected as an option.

All wetted materials are from stainless steel as a standard.

By using a diaphragm measuring system, the model APW absolute pressure switch is extremely robust and guarantees optimal operating characteristics and the highest measuring performances, with repeatability lower than 1 % of span.
Standard version

Measuring system
Single diaphragm with transmission shaft, without sealing elements

Switch enclosure
Stainless steel 316L, tamper-proof. Laser-engraved product label from stainless steel.

Ingress protection
IP66 per EN/IEC 60529, NEMA 4X

Permissible temperature
Ambient \( T_{\text{amb}}^\circ\text{C} \): -30 ... +85 \( ^\circ\text{C} \)
Medium \( T_M^\circ\text{C} \): -30 ... +85 \( ^\circ\text{C} \)

Switch contact
Micro switches with fixed dead band
- 1 x or 2 x SPDT (single pole double throw)
- 1 x DPDT (double pole double throw)
Micro switches with adjustable dead band
- 1 x SPDT (single pole double throw)

The DPDT function is realised with 2 simultaneously triggering SPDT micro switches within 0.5 % of the span.

2) Permissible ambient temperature range: -30 ... +70 \( ^\circ\text{C} \)
3) WIKA recommends argon-gas-filled contact versions, use of adjustable dead band allowed.

Ignition protection type (option)
- Ex ia I Ma (mines)
- Ex ia IIIC T6/T4 1) Ga (gas)
- Ex ia IIIC T85/T135 1) Da (dust)

1) The temperature class is related to the ambient temperature range. See the type examination certificate for further details.

Set point adjustment
The set point can be specified by the customer or factory-set within the setting range. Subsequent adjustment of the set point on site is made using the adjustment screw, which is fastened to the switch and thus secured against loss.

Repeatability of the set point
\( \leq 1 \% \) of span

Distance between set points
For versions with 2 x SPDT the distance between the set points must be > 5 % of the respective span.

Please specify:
Set point, switching direction for each contact, e.g.:
- Set point 1: 100 mbar abs., falling, set point 2: 150 mbar abs., rising.
With two micro switches, the set points can be set independently of each other.

For optimal performance we suggest to adjust the set point between 25 ... 75 % of the span.
Example
Setting range: 0 ... 1 bar abs. with one switch contact
Repeatability: 1 % of 1 bar abs. = 0.01 bar abs.
Dead band: (see table setting ranges)
2 x repeatability + dead band =
2 x 0.01 bar abs. + 0.04 bar abs. = 0.06 bar abs.
Rising pressure: Adjust set point between 0.06 ... 1 bar abs.
Falling pressure: Adjust set point between 0 ... 0.94 bar abs.

Process connection
Stainless steel, lower mount (LM)
- ¼ NPT female (standard)
- ½ NPT, G ½ A, G ¼ A male via adapter
- ½ NPT, G ¼ female via adapter
- M20 x 1.5 male via adapter

Mounting
- Mounting fixture from stainless steel (AISI 304)
- Option: Mounting bracket for 2" pipe mounting (AISI 304)

Weight
- Model APW: approx. 5.5 kg
- Model APW10: approx. 8.2 kg

Assembly
- Shut-off valve model 910.11, see data sheet AC 09.02
- Barstock valve model 910.81, see data sheet AC 09.18

Options
- Cleaned for oxygen service
- Offshore version 1)

1) WIKA recommends argon gas-filled contact versions, use of adjustable dead band allowed.
