Differential pressure switch
For very low setting ranges
Model DW03UN

Applications
- Differential pressure monitoring and control of processes
- Safety-critical applications in general process instrumentation, especially in HVAC and power generation incl. nuclear power plants
- For gaseous and dry media

Special features
- No power supply needed for switching of electrical loads
- Robust switch enclosure from stainless steel 316L, IP66, NEMA 4X
- Setting ranges from 0.3 ... 2.5 mbar to 0.7 ... 16 mbar with high working pressure and high static pressure up to 300 mbar
- Intrinsic safety Ex ia available
- 1 set point, SPDT, high switching power up to AC 250 V, 10 A

Description
These high-quality differential pressure switches have been developed especially for safety-critical applications. The high quality of the products and manufacturing in accordance with ISO 9001 ensure reliable monitoring of your plant. In production, the switches are traced by quality assurance software at every step and subsequently are 100 % tested.

In order to ensure as flexible operation as possible, the differential pressure switches are fitted with micro switches, which enable the switching of an electrical load of up to AC 250 V, 10 A directly.

By using a diaphragm measuring system, the model DW03UN differential pressure switch is extremely robust and guarantees optimal operating characteristics and the highest measuring performances, with repeatability lower than 1 % of span.

The process connection with a centre distance of 54 mm lower mount allows an easy and comfortable mounting of a standard valve manifold.
Standard version

Measuring system
Single diaphragm
For clean gas or non-condensing vapour only

Switch enclosure
Stainless steel 316L, tamper-proof. Laser-engraved product label from stainless steel.

Ingress protection
IP66 per EN/IEC 60529, NEMA 4X

Permissible temperature
Ambient $T_{\text{amb}}$: -10 ... +60 °C
Medium $T_M$: -10 ... +60 °C

Switch contact
Micro switches with fixed dead band
1 x SPDT (single pole double throw)

Contact version | Electrical rating (resistive load) | Suitable for Ex ia option
--- | --- | ---
UN | 1 x SPDT, silver | 250 V, 10 A | 125 V, 0.1 A | Yes

Set point adjustment
The set point can be specified by the customer or factory-set within the setting range. Subsequent adjustment of the set point on site is made using the adjustment screw, which is fastened to the switch and thus secured against loss.

Repeatability of the set point
≤ 1 % of span

Please specify:
Set point, switching direction for the contact, e.g.:
Set point: 5 mbar, falling
For optimal performance we suggest to adjust the set point between 25 ... 75 % of the span.

Example
Setting range: 0.4 ... 10 mbar with one switch contact
Repeatability: 1 % of 9.6 mbar = 0.096 mbar
Dead band: (see table setting ranges)
2 x repeatability + dead band = 2 x 0.096 mbar + 0.3 mbar = 0.492 mbar.
Rising pressure: Adjust set point between 0.892 ... 10 mbar.
Falling pressure: Adjust set point between 0.4 ... 9.508 mbar.

Process connection
Lower mount (LM)
- ¼ NPT female (standard)
- ½ NPT, G ½ A, G ¼ A male via adapter
- ½ NPT, G ¼ female via adapter
- M20 x 1.5 male via adapter

Wetted parts
Diaphragm: Glass-fibre reinforced NBR
Process connection: Aluminium casting alloy,
Anticorodal® UNI 3571
Other parts: Stainless steel, epoxy resin coated

Electrical connection
- ½ NPT female (standard)
- ¾ NPT, M20 x 1.5, G ½, G ¾ female
- Cable gland non-armoured, nickel-plated brass
- Cable gland non-armoured, stainless steel (AISI 304)
- Cable gland armoured, nickel-plated brass
- Cable gland armoured, stainless steel (AISI 304)
- MIL connector, 7-pin, DTL 5015

For cable connections to the internal terminal block use wire cross-sections between 0.5 ... 2.5 mm².
For the grounding cable connection to the protective conductor use max. 4 mm² for the internal and external screw.

Dielectric strength
Safety class I (IEC 61298-2: 2008)

Mounting
- Mounting fixture from stainless steel (AISI 304)
- Option: Mounting bracket for 2" pipe mounting (AISI 304)

Weight
- approx. 2.2 kg

Ignition protection type (option)
- Ex ia IIC T6/T4 ¹ Ga (gas)
- Ex ia IIIC T85/T135 ¹ Da (dust)

¹ The temperature class is related to the ambient temperature range. See the type examination certificate for further details.

Safety-related maximum values
(only for optional Ex ia versions)
